

mobile made easy.

OPTIMIZE YOUR WORKFORCE WITH RELEVANT INFORMATION THAT IS ALWAYS AVAILABLE

Mobile TRIRIGA Work Manager extends your TRIRIGA system to mobile users, driving productivity, accurate and timely data capture and better scheduling of resources. Built on Syclo's powerful Agency platform, Mobile TRIRIGA Work Manager is fully configurable to match your environment, workflow and information needs.

MOBILIZE YOUR EVERYDAY ACTIVITIES

- Work Orders
- Job Plans and Tasks
- Inventory Management
- Inspections
- Condition Monitoring
- Equipment Audits
- Report Generation

REALIZE BOTTOM LINE BUSINESS BENEFITS

- Lower your operating costs
- Boost worker performance
- Ensure accuracy and timeliness of data for compliance reporting
- Improve planning and decision-making

BOOST PRODUCTIVITY

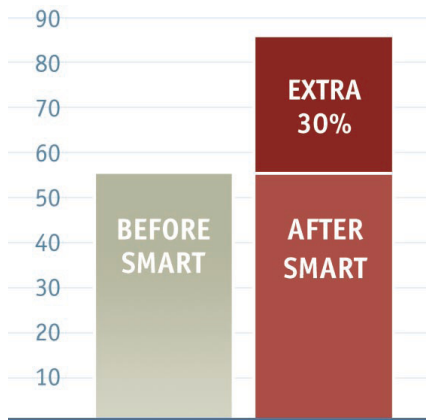

Mobile TRIRIGA Work Manager increases employee productivity by streamlining the flow of information and eliminating paperwork. With real-time access to work, inventory and historical information, your workers spend less time waiting and making decisions — and more time working. Recording work as it's being completed eliminates end-of-day paperwork sessions, meaning more gets done every day.

IMPROVE WORK MANAGEMENT

Achieve full visibility into work status information and enjoy the benefits of capturing 100% of the information you need for planning and reporting. Empower your employees to update customer accounts, place orders, transfer or reassign work and update your enterprise systems on the spot.

EXCEED CUSTOMER EXPECTATIONS

Use Mobile TRIRIGA Work Manager to extend asset life, reduce mean time between failures and improve first time fix rates. Maintain service level agreements (SLAs) and ensure customer satisfaction — while knowing exactly how much it's costing you.

SOPHISTICATED TECHNOLOGY THAT MAKES MOBILE EASY

CONFIGURE YOUR MOBILE TRIRIGA APPLICATION

Your Mobile TRIRIGA applications can be fully configured using Syclo's advanced Agency Editor. Nested in the powerful Eclipse software development platform, Agency Editor allows you to quickly and inexpensively customize your application to closely match your workflow and data needs.

RELIABLY INTEGRATE WITH TRIRIGA AND OTHER SYSTEMS

Syclo's advanced SOA framework takes the pain and uncertainty out of systems integration. From enabling free flow of information to and from your TRIRIGA 7.x, 8i and 9i systems to creating robust composite integrations, Syclo ensures that your mobile applications and your back-end systems always speak the same language.

ENSURE DATA SECURITY

Security is not underestimated at Syclo, and it is built into the very core of our products. In fact, Syclo's solutions are trusted by many government agencies and contractors on projects where security is paramount. And of course, you get complete flexibility in your security settings.

WORK ONLINE OR OFFLINE

Always available and completely flexible. That, in a nutshell, is all you need to know about connectivity options with Syclo's solutions for TRIRIGA. The longer version? Syclo's advanced communications management feature set allows you to transmit what you want, when you want and using whatever network best fits your environment.

MIX AND MATCH DEVICES AND PERIPHERALS

With an ever-growing diversity of mobile devices on the market and with very little standardization among them, trying to deploy a mobile solution that works for all of your users may leave you scratching your head. Syclo takes the risk out of your mobile projects by supporting the hardware you need today and tomorrow.

EASILY MANAGE YOUR MOBILE SOLUTION

From over-the-air application upgrades and powerful troubleshooting tools to always supporting the latest in mobile and wireless technology, Syclo ensures that your mobile solutions are easy to manage and inexpensive to modify as your business changes.

SYCLO TAKES THE RISK OUT OF MOBILE TRIRIGA DEPLOYMENTS BY MANAGING THE COMPLEXITIES OF INTEGRATION, DEVICES AND NETWORKS

- DISPATCH WORK ORDERS
- ACCESS JOB PLANS
- MANAGE INVENTORY
- PERFORM INSPECTIONS
- CAPTURE TASK-RELATED INFORMATION

BENEFITS FOR YOUR BUSINESS

ELIMINATE PAPERWORK AND GAIN WRENCH TIME

Put an end to unproductive, error-prone paperwork sessions at the end of each shift. Reduce foot traffic and wasteful idle and travel time. Increase technician time spent on equipment. Ditching that clipboard may be the best thing you've ever done for your business.

DELIVER DATA TO TECHNICIANS AND WORK SMARTER

Give your employees access to data where it matters most. With real-time access to repair histories, tools and parts inventories and detailed instructions, your technicians can make decisions with confidence and be in and out faster.

CAPTURE MORE DATA TO BETTER PLAN AND SCHEDULE RESOURCES

With a mobile solution from Syclo, maintenance organizations significantly increase both the amount and the quality of data uploaded into TRIRIGA. By having your employees record all the information you need in intuitive, job-relevant application screens, you can finally have the data you need to build effective reliability-based PM programs, improve first time fix rates, speed up billing and improve scheduling of resources.

IMPROVE COMPLIANCE REPORTING

Mobile TRIRIGA Work Manager can help you capture complete and uniform information for the work that your team does — simplifying regulatory compliance and providing data for internal analysis. You can even use e-validation and e-signature capabilities to authenticate your transactions and reports.

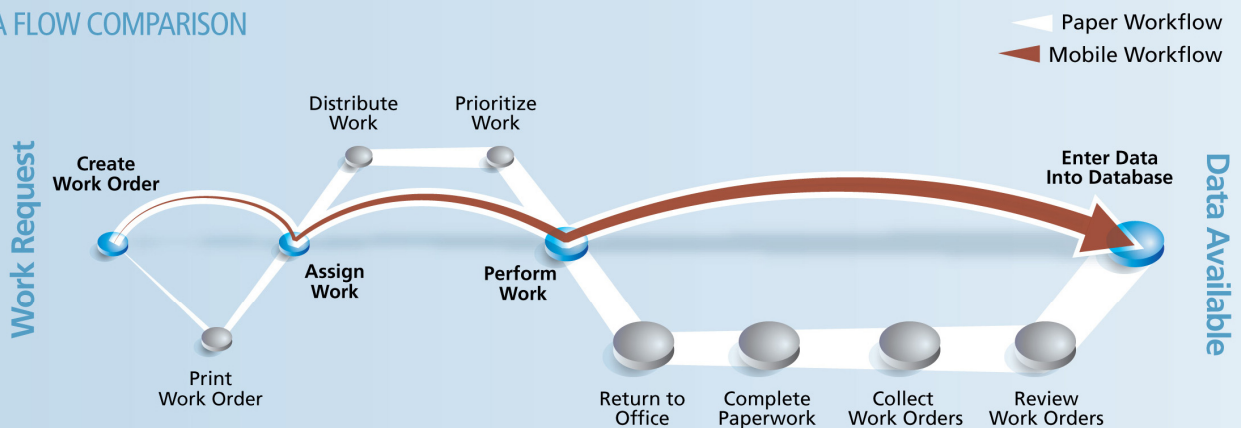

By eliminating end-of-shift paperwork sessions, organizations can often expect each tech to complete at least one more additional work ticket per shift. For a staff of 30, this can mean thousands of additional tickets per year:

**30 TECHNICIANS DOING ONE
ADDITIONAL TICKET ON 220 SHIFTS
COMPLETE 6,600 MORE WORK
ORDERS EVERY YEAR**

COMPRESS the number of steps and people required to perform activities

DATA FLOW COMPARISON

INCREASE PRODUCTIVITY, CONTROL COSTS AND CAPTURE MORE DATA FOR BETTER REPORTING

ARMED WITH JOB PLANS AND REPAIR HISTORIES, YOUR TECHNICIANS WORK SMARTER — KEEPING VITAL ASSETS RUNNING AND CUSTOMERS SATISFIED.

Mobile TRIRIGA is built on Syclo's Agentry technology. Syclo's flagship Agentry™ platform provides the flexibility and agility that organizations need to design, develop and deploy customized solutions quickly and cost-effectively. Completely configurable and future-proof, the service-oriented architecture seamlessly integrates with existing systems and supports a variety of languages, peripherals, and networks for real-time and offline computing. ABOUT SYCLO

Since 1995, Syclo has helped more than 750 organizations across industries to leverage mobile technology to streamline workflow and improve productivity. Syclo's solutions make data collection and decision making faster, easier and more reliable — reducing costs and driving more value from enterprise systems. Together, Syclo's Agentry™ platform and SMART Mobile Suite products help companies gain a real-time, 360-degree view of operations to support ongoing growth and profitability.

READY-TO-DEPLOY SOLUTIONS

Over the years, Syclo used the Agentry Platform to create a comprehensive family of ready-to-deploy mobile applications for key business processes like work scheduling and dispatch, inventory management, rounds and inspections. Designed for your enterprise systems and configurable to match your workflow, Syclo's SMART Mobile Suite applications are a proven way to quick ROI.
