

mobile made easy.

SMART Auditor

MOBILE DEVICES MAKE COLLECTION OF ASSET DATA EASILY AUTOMATABLE

SyClo's SMART Mobile Suite is the most widely deployed solution for enterprise asset management (EAM), enabling maintenance and field service teams to automate workflow and maximize productivity. By replacing inefficient paperwork and extending EAM systems to technicians via mobile devices, SMART boosts productivity, increases first-time fix rates and enables more data to be captured at the point of performance.

Use SMART Auditor to automate the critical collection of asset data, speed ongoing audits and efficiently conduct condition monitoring. Rapidly record, synchronize and upload detailed asset information to back-end systems and asset monitoring applications. Built on SyClo's flagship mobile platform, Agentry™, SMART is 100% configurable, runs on a variety of devices and supports both real-time wireless and offline computing.

BUSINESS BENEFITS

- Know your resources.
- Speed regular asset audits.
- Create work requests from the field.
- Increase data available in the EAM system.

BETTER TRACK ASSETS

Expensive assets are at work for your enterprise, from the storeroom to the boardroom. Regularly scheduled asset audits serve multiple purposes, such as verifying asset locations and internal equipment control numbers.

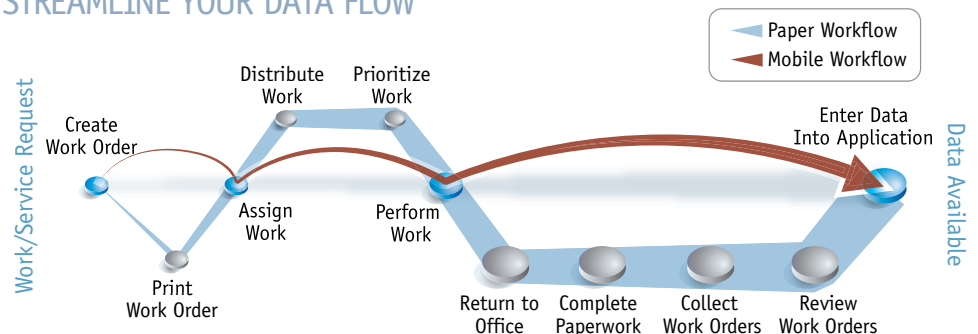

IMPROVE OPERATING EFFICIENCY

Regular asset audits are performed more quickly and thoroughly using SMART Auditor. Record condition assessments and generate work requests directly from a hand-held device — or create a work order on the spot and troubleshoot equipment in need of repair. Management can use more accurate data to execute effective preventive maintenance programs for prolonging the life of valuable assets.

BUILD ASSET INVENTORY DATABASES

Arming personnel with SMART Auditor helps organizations build accurate and detailed asset inventory databases during a CMMS/EAM installation or update. Virtually every piece of equipment can be catalogued and data standards can be enforced.

STREAMLINE YOUR DATA FLOW

The SMART Mobile Suite of out-of-the-box solutions enables your organization to quickly reach a new level of efficiency — significantly affecting the bottom line and lowering the total cost of ownership.

FEATURES AND FUNCTIONS

- Record class, subclass and asset descriptions.
- Conduct physical counts.
- Capture descriptive details and nameplate information.
- Verify equipment location.
- Monitor condition of assets.
- Match purchase order to equipment, parts and tools received.
- Compile asset data collection hierarchy.
- Create work requests on demand.
- Build spare parts and job plans.

Isolate problem assets and create maintenance requests in the field. Perform condition monitoring assessments during audits by identifying problems and generating work tickets.

Because Syclo's SMART products maximize data flow and communication among personnel, overall productivity dramatically increases with each additional technician on staff.

SMART Mobile Suite

Syclo's SMART Mobile Suite is a comprehensive family of prepackaged and preintegrated applications all designed to increase productivity, improve data accuracy, automate workflow and significantly lower operating costs. Products include Work Manager, Inventory Manager, Auditor, Inspections, Rounds, Schedule and more. Companies can maximize their investment in mobile technology by deploying multiple SMART products across functions.

AGENTRY MOBILE PLATFORM

Syclo's flagship Agentry™ platform provides the flexibility and agility that organizations need to design, develop and deploy customized solutions quickly and cost-effectively. Completely configurable and future-proof, the service-oriented architecture seamlessly integrates with existing systems and supports a variety of languages, peripherals and networks for real-time wireless or offline computing.

ABOUT SYCLO

Since 1995, Syclo has helped more than 800 organizations across industries leverage mobile technology to streamline workflow and improve productivity. Syclo's solutions make data collection and decision making faster, easier and more reliable — reducing costs and driving more value from enterprise systems. Together, Syclo's Agentry™ platform and SMART Mobile Suite products help companies gain a real-time, 360-degree view of operations to support ongoing growth and profitability.
